Fine filter BOXER KDX 1½" – 2"

KX 1½" – 2"

KDX 1½" – 2"

Fine filter
BOXER KX 1½" – 2"
BOXER KDX 1½" – 2"

Intended use

The fine filters BOXER KX and BOXER KDX are designed for filtering drinking water.

The fine filter BOXER KDX with pressure reducer, in addition, is suitable for the adjustment of the outlet pressure on the withdrawal side in order to maintain the max. admissible operating pressure stipulated in DIN EN 806-2.

The filters can be used for positive and negative pressure applications. The adjustment of the outlet pressure on the withdrawal side, however, only works when applied in the positive pressure range.

The filters are not suitable for circulation water that has been treated with chemicals.

They are neither suitable for oils, greases, solvents, soaps and other lubricating media, nor for the separation of water-soluble substances.

The filters are designed according to the stipulations of DIN EN 13443-1 and DIN 19628 and are intended for installation into drinking water pipes according to DIN EN 806-2 (installation immediately downstream of the water meter).

They protect the water pipes and connected water-carrying system parts from disturbances and corrosion damage due to undissolved impurities (particles) such as rust particles, sand, etc.

Function

The unfiltered drinking water flows into the filter through the inlet side and from the outside in through the filter element and to the pure water outlet. Thus, foreign particles of > 100 µm in size are retained.

According to DIN EN 806-2, the filter element must be replaced every 6 months at the latest.

Depending on their size and weight, the foreign particles either stick to the filter element, or they fall straight down into the filter cylinder.

By means of the flow-optimised pressure reducer of the fine filter BOXER KDX, which is designed according to DIN EN 1567, the outlet pressure on the withdrawal side can in addition be set to 1 – 6 bar (factory setting: 4 bar).

Design

- Pre-assembled, rotatable connection flange made of plastic, including water meter screw connections made of dezincification-resistant brass, with seals and stainless steel screws
- Filter head with pressure gauge and maintenance ring to set the next maintenance date (replacement of filter element)

- BOXER KDX additionally with pressure reducer and pressure gauge integrated in the filter head
- Support mesh made of plastic with filter spring made of stainless steel
- Replaceable filter element made of polyester fabric (pore size 100 µm).
- Transparent blue filter cylinder that can be tightened by hand
- All water-contacting parts comply with the German Drinking Water Ordinance. Test regulations: KTW, DVGW W 270, DIN 50930-6
- All materials are recyclable

Scope of supply

- Fine filter with connection flange
- Water meter screw connection
- Seals
- 100 µm filter element
- Pressure gauge
- Quick reference manual

Additionally for **BOXER KDX**

- Pressure reducer cartridge

Installation requirements

Obey the local installation directives, general guidelines and technical specifications.

The installation site must be frost-proof and ensure the filter's protection from chemicals, dyes, solvents and their vapours as well as from direct sunlight.

The installation site must be easily accessible for maintenance purposes.

Accessories/consumables

According to DIN EN 13443-1 filter elements with 5 µm, 20 µm and 50 µm are not admissible for the drinking water systems.

2x each included in scope of supply.

Tested according to DVGW

103000010001
